Danica McKellar's Mathematical Theorem

Danica McKellar says her first love is acting, but she's happy to serve as a role model for young women who are interested in math.

Weekend Edition - Saturday, February 11, 2006 · As a child, actress Danica McKellar played Winnie on the TV show *The Wonder Years*. Later, she made many appearances on *The West Wing*. But she's also a mathematician who recently proved her own theorem. McKellar talks numbers with Scott Simon and Stanford professor Keith Devlin.
